Education

OP Jindal University

B.Tech in CSE 4th year

Raigarh, CG

CGPA:7.83

Sanskar City International School

Higher Secondary Certificate

Secondary School Certificate

Bhilai, CG

Percentile:65

Percentile:72

Skills

- Python
- Java
- HTML,CSS,PHP
- DBMS
- Deep Learning, Machine Learning

Projects

Fertility Prediction

Developed a Python-based ML fertility prediction system, classifying status from medical/lifestyle data. Used data preprocessing, feature selection, and trained models (Logistic Regression, SVM, Random Forest).

Alzheimer disease detection using MRI

Developed a deep learning Alzheimer's detection system using Python and CNNs to classify MRI images into multiple cognitive impairment stages. Enhanced model generalization and class balancing. Achieved high accuracy training models with TensorFlow/Keras.

Emotion-Aware Decision Support System

Built an NLP + ML system using TF-IDF and Random Forest to predict emotions and recommend actions. Implemented feature engineering, model training, and decision logic. Generated predictions with confidence scores and actionable insights

Experience

- Participated in SIH25 : SIH25049
- Google Student Ambassador-25

Certifications

- [Python Data Structures](#)
- [GenAI Powered Data Analytics Job Simulation](#)
